

Ambr(R) 250 Modular / High Throughput - 100-250 mL working volume

Local source PDF | preset sartorius-ambr-250 | compiled 10 September 2026

This PDF is stored inside the GitHub project and records the evidence used by the simulator. It is not a copied vendor brochure or manual. The official manufacturer references below remain the authoritative originals.

Manufacturer: Sartorius

Product-contact material: Plastic / single-use

Working volume: 100 mL to 250 mL

Nominal vessel or bag size: 250 mL

Simulation profile: microbial

Evidence status: Direct official product-family evidence

Original manufacturer references

1. Sartorius - Ambr Multi-Parallel Bioreactors

[Open official manufacturer source online](#)

<https://www.sartorius.com/en/products/fermentation-bioreactors/ambr-multi-parallel-bioreactors>

Supports: Product family, vessel scale, intended application, mixing and sensor platform.

Evidence basis

Volume: The stated working-volume range is taken from the official Ambr family material.

Material: The vessel is treated as a disposable rigid polymer vessel.

- The two-impeller microbial configuration and high agitation ceiling are source-supported; the selected starting RPM remains a simulator starting point.

Record note

This source PDF is paired with the detailed HTML provenance record in the same repository. Simulator-specific defaults and derived assumptions are listed there.

Copyright and trademarks in the linked manufacturer documentation remain with the respective vendor.
