

Univessel(R) Glass 10 L - 10 L vessel

Local source PDF | preset sartorius-univessel-glass-10 | compiled 10 September 2026

This PDF is stored inside the GitHub project and records the evidence used by the simulator. It is not a copied vendor brochure or manual. The official manufacturer references below remain the authoritative originals.

Manufacturer: Sartorius

Product-contact material: Glass

Working volume: 3 L to 10 L

Nominal vessel or bag size: 10 L

Simulation profile: glass

Evidence status: Mixed: nominal scale sourced; minimum working volume estimated

Original manufacturer references

1. Sartorius - Univessel Glass product information

[Open official manufacturer source online](#)

<https://www.sartorius.com/en/products/fermentation-bioreactors/benchtop-bioreactors/univessel-glass>

Supports: Reusable glass vessel family and available nominal vessel sizes.

2. Sartorius Shop - Bioreactor vessel catalogue

[Open official manufacturer source online](#)

<https://shop.sartorius.com/be/c/bioreacteurs>

Supports: Supporting catalogue listing for reusable vessel configurations.

Evidence basis

Volume: The nominal glass-vessel size is source-supported. The minimum working volume in the simulator is an engineering estimate used to initialize the model.

Material: Reusable borosilicate glass is the principal product-contact vessel material; metal headplate and fittings may also contact the process.

- No additional note.

Record note

This source PDF is paired with the detailed HTML provenance record in the same repository. Simulator-specific defaults and derived assumptions are listed there.
