

Thermo Scientific™ DynaDrive™ Single-use Bioreactor 5000 L - 250-5000 L working volume

Local source PDF | preset thermo-dynadrive-5000 | compiled 10 September 2026

This PDF is stored inside the GitHub project and records the evidence used by the simulator. It is not a copied vendor brochure or manual. The official manufacturer references below remain the authoritative originals.

Manufacturer: Thermo Fisher Scientific

Product-contact material: Plastic / single-use

Working volume: 250 L to 5000 L

Nominal vessel or bag size: 5000 L

Simulation profile: mammalian

Evidence status: Direct official family/model evidence

Original manufacturer references

1. Thermo Fisher Scientific - DynaDrive Single-Use Bioreactors

[Open official manufacturer source online](#)

<https://www.thermofisher.com/fr/fr/home/bioprocessing/products/bioreactors/single-use-dynadrive.html>

Supports: DynaDrive family sizes, working-volume turndown and single-use BPC architecture.

2. Thermo Fisher Scientific - DynaDrive 5000 L catalogue page

[Open official manufacturer source online](#)

<https://www.thermofisher.com/order/catalog/product/DDB5000.1021>

Supports: 5000 L model and 250-5000 L working-volume range.

Evidence basis

Volume: The model and working-volume range follow official DynaDrive family or model information.

Material: Disposable BPC is the product-contact vessel. Stainless-steel frame/jacket fields on catalogue pages describe support hardware.

- DynaDrive is represented with a generic mammalian stirred-tank profile unless model-specific values are explicitly stored.

Record note

This source PDF is paired with the detailed HTML provenance record in the same repository. Simulator-specific defaults and derived assumptions are listed there.
