

Thermo Scientific™ HyPerforma™ Rocker with 20 L BPC - approximately 2-10 L working volume

Local source PDF | preset thermo-rocker-20 | compiled 10 September 2026

This PDF is stored inside the GitHub project and records the evidence used by the simulator. It is not a copied vendor brochure or manual. The official manufacturer references below remain the authoritative originals.

Manufacturer: Thermo Fisher Scientific

Product-contact material: Plastic / single-use

Working volume: 2 L to 10 L

Nominal vessel or bag size: 20 L

Simulation profile: rocking

Evidence status: Family evidence with derived bag-specific working range

Original manufacturer references

1. Thermo Fisher Scientific - HyPerforma Rocker Bioreactor

[Open official manufacturer source online](#)

<https://www.thermofisher.com/order/catalog/product/jp/en/F100-2683-002>

Supports: Rocker hardware, supported BPC sizes and published overall operating range.

Evidence basis

Volume: Supported BPC nominal sizes are source-supported. The bag-specific working ranges are approximate subdivisions of the published rocker operating envelope.

Material: Disposable flexible BPC is the product-contact vessel.

- This is a rocking system with no conventional impeller; impeller fields are placeholders required by the current stirred-tank engine.

Record note

This source PDF is paired with the detailed HTML provenance record in the same repository. Simulator-specific defaults and derived assumptions are listed there.
